

# Welcome to our 8th Grade Math Class!

I am **Mr. Turco** and I am *so excited* to be your math teacher this year!

This year, we will work on new programs called **Ready Math & iReady!**  
You will learn a variety of math topics that you will continue to see during your four years of high school and then beyond to college.

With **Ready Math**, we will be working out our problems as a class, in pairs, and on our own! Each lesson is about 3-5 days long and after each lesson, you will take a short quiz!

**iReady** is the online portion that is going to help us practice *old* and *new* skills! Our goal is going to be 30-45 minutes per week!

Our **grades** are going to consist of our quizzes/tests, classroom participation, assigned classwork, homework, and iReady.

50% Tests/Quizzes  
40% Classwork  
10% Homework

I firmly believe that *nobody* is born a "Math Person" and I will do **my best** to help you understand the math concepts we will learn this year!

I look forward to an excellent year of learning with you!

Sincerely,  
Mr. Turco
